

ACD GROUP ...to get things moving!

COMPUTER TECHNOLOGY

EMS

Electronic Manufacturing
Services

The business area Computer Technology - the EMS provider of the ACD group - develops, manufactures, checks and tests at two locations in Germany.

Your custom-made solution

Whether industrial controls, data or medical technology, or components for automotive or military applications, our customers' products are in expert hands from development, layout design and component procurement via prototype construction, series assembly to final test.

From concept to product. All from one supplier.

Electronic development
Electronic production
Quality assurance

QM certificates

- DIN EN ISO 9001
- DIN EN ISO 14001
- IPC A 610-E
- ISO/TS 16949
- ISO 13485

ACD GROUP ...to get things moving!

Development from concept to pilot series

- Hardware development
- Software development
- Layout development of complex analogue and digital layouts
- CAD printed circuit board decartelization
- EMV tests
- Application of most advanced printed circuit technologies

Electronic production

- Component acquisition
- Construction of prototypes
- SMD mounting
- Through hole mounting
- Vapor phase, wave-, selective- and manual soldering
- Mounting

Quality assurance

- Automatic X-ray tests
- Automatic optic inspection
- Product specific function control
- In-circuit test
- Boundary scan
- Burn-in
