

MAX mobile workstation

Reduces travel time and makes IT equipment mobile

Enables independent work in the following areas of application:
Entire warehouse environment – Incoming/outgoing goods – Quality assurance – Inventory

Simple battery changing process

Customised to meet your needs

Reduces travel times

MAX 200
The entry-level solution

- Narrow single-column model
- Low weight
- Optionally available with 24 V or 230 V operating voltage

MAX STD
The workhorse

- Output classes: 350 VA, 800 VA or 1,200 VA
- Simple battery change systems
- Optionally available with 24 V or 230 V operating voltage

MAX Li-Ionen
The lightweight option

- Output class: 350 VA
- Short charging cycles
- Low weight
- Longer running times
- Increased service life
- Ideal for multi-shift operation
- Lithium iron phosphate battery

MAX TK
The cool customer

- Refrigerated storage areas down to -28 °C
- Special thermal insulation
- Able to work uninterrupted for up to 8 hours
