

## MAXimum space for your IT equipment! The new MAX Plus mobile workstation

Our MAX mobile workstation product family continues to grow. With the MAX Plus, we have developed a mobile workstation that offers significantly more space for IT equipment than the current mobile workstations in the MAX BE series. Thanks to up to 40% more work and storage space, the MAX Plus can also be used for processes that require more extensive equipment on site in the warehouse. Efficient and time-saving work directly on the goods is therefore possible without any problems.

The new MAX Plus is available as a Li-Ion version in two different power classes (800 VA and 1200 VA). Compared to the other MAX models from ACD Elektronik, the basic trolley is slightly wider, with dimensions of 631 x 1125 x 632 mm. The design has been adopted from the already established MAX BE models, including the practical perforated grid for standard accessories, the new black of the MAX BE and the side columns with two outer groove profiles, which enable quick and easy attachment of scanner, pen, and cup holders. Our new MAX Plus mobile workstation makes it easy to adapt the MAX Plus to different areas of application and to the wishes and needs of the user.

Further information on our upcoming trade fair visits can also be found on our [homepage](#).

### ACD All-in-One

The ACD All-in-One is ACD Elektronik's all-round carefree package for firmware, operating systems, ACD apps and programs. An ACD All-in-One contract gives you extended access to our download portal and the latest information, upgrades and updates are always available to you. With the ACD All-in-One you are always up to date.

The following new features are available on our download portal:

- There are new versions of the **ACD EasyToConnect 2.0** app for the Android™, Windows® and Linux operating systems. Regular product maintenance has been carried out for version 2.43 on Android™ as well as for versions 2.4 on Windows® and 1.12 on Linux.
- There is also a new version of **ACD KioskMode**. The latest version 1.39 is mainly a product update to further improve usability.
- There is also a new image for the **M2Smart®SE**. In version 2.3.1, the image for Android™ has been further optimized. The release notes and history have also been updated.
- A new image is also available to download for the **M270SE**. The image for Android™ has also been optimized for version 2.3.1. At the same time, the release notes and the history have been updated.
- We have also released a new image for the **M2Smart® HMI10** and the **M2Smart® HMI10 Wired**. The corresponding release notes and history are, of course, also available for the current version 1.20.1.
- A new image is also now available to download for the vehicle mount terminals in the **MFT1xSE series with Windows® 10 IoT Enterprise (LTSC-2021)**. The new Wi-Fi6E wireless card has been integrated into the new version 2.00. The release notes have also been updated.
- **MAX Plus** is a completely new addition to our download portal. All important documents are now available for download.

### Curious now?

Request your free trial of our new MAX BE Black Edition Mobile Workstation today. Our sales team will be happy to provide you with further information or answer any questions you may have about the configuration options for our Mobile Workstations.

We look forward to receiving your call or inquiry at [sales@acd-elektronik.de](mailto:sales@acd-elektronik.de).

Best regards from southern Germany
