HOW TO CHOOSE THE

RIGHT INDUSTRIAL MOBILE WORKSTATION

Every facility has different needs, so it is important to consider the following factors when choosing your workstation:

APPLICATION

1.

Depending on your requirements, you might need a workstation with different features, including power source, battery type, printer, drawers with locking mechanisms, or a keyboard/mouse tray.

PORTABILITY

2.

A wheeled workstation will allow workers to bring a computer, printer, and monitor with them on the job for easier data collection and access to scanners, labels, and tools necessary for the job.

5. EQUIPMENT CAPACITY

Be sure to choose a workstation that has the ideal shelving configuration for the equipment you will use. 3.

POWER SOURCE

Depending on your computer, devices, and multiple shift work you may require different power configurations, battery types, or an easy

EMPLOYEE HEALTH AND SAFETY

4.

battery change system.

Using a high quality mobile workstation can reduce worker fatigue by allowing employees to take fewer steps on the job. Customizing a workstation to meet the demands of multiple tasks will help to improve efficiency.
