Customized and flexible solutions for your logistics!

Even more flexible – the MAX BE mobile workstation

We are constantly developing new equipment in our efforts to offer our customers the best possible solutions and to adapt the MAX BE Mobile Workstation to the individual needs of the user in their daily work. One of these new features for our MAX BE is a perforated side panel with a 10 mm x 10 mm grid that can be mounted on the left side of the Mobile Workstation. Analogous to the perforated grid on the base frame, commercially available accessories can be easily and flexibly attached to this.

Whether it's a storage tray, tool holder, pegboard hook or small parts tray, with the perforated side panel you always have the required tool directly at hand.

New magnetic waste box

Since its introduction, the magnetic waste box has been very popular. Due to several requests, we have decided to offer a larger version with a volume of 25 liters in addition to the previously available 10-liter version. Just like the 10-liter version, the larger waste box also has three powerful magnets and can therefore be attached directly to the MAX BE mobile workstation in different positions.

More space for your IT equipment

Another new feature that we have developed for our MAX BE mobile workstation is the printer shelf on the right. This can be quickly and easily mounted on the right-hand side and is height-adjustable. With a load capacity of up to 20 kg, the printer shelf on the right can be used for a wide range of standard printers and other IT equipment.

Care of the mobile workstation over the holiday break

To care for your Mobile Workstation and to prevent a deep discharge, please fully charge your MAX BE again before the holidays. Alternatively, you can simply leave it plugged in and unplug it after the holiday break. If you have any questions or concerns about the care of your Mobile Workstation, we will be happy to help.

Curious? Request your free trial of our Mobile Workstation MAX Black Edition today. For further information or questions about the configuration options for our mobile workstations, please do not hesitate to contact our sales team.

A new team for even more services

To provide our customers with even closer support throughout the entire product life cycle, we have set up a new team. Our Technical Consulting team consists of various experts who know our devices inside out. They will support you from the first test to the commissioning of our devices and answer any technical questions you may have throughout the entire life cycle of the products. You can contact our new Technical Consulting team using the following contact details:
Phone: +49 7392 708-488
E-Mail: support.technik@acd-elektronik.de

ACD All-in-One

The ACD All-in-One is ACD Elektronik's all-round carefree package for firmware, operating systems, ACD apps and programs. An ACD All-in-One contract gives you extended access to our download portal and the latest information, upgrades and updates are always available to you. With the ACD All-in-One, you are always up to date. The following new features are available on our download portal:

- For our **MFT1xSE** series vehicle mount terminals running Windows[®] 11 IoT Enterprise with the LTSC-2024 license, there is a new image V1.00 and updated release notes.
- There is new firmware for all variants of our **HasciSE** wearable barcode scanner. Version V2.23 includes, among other things, the integration of further control characters such as the "Group Separator" control character.
- There is also a new image for our **M2Smart®SE**. The release notes and history for version V2.06 have also been updated.
- Furthermore, the release notes and history have also been updated for the **M270SE**. The image version V2.06 is now available for download.
- A new version V1.27 of the **M2UHF-RFID Demo App** is now available for download. The new version has been optimized for use with Android™ 11.

For further information or questions about our products, please do not hesitate to contact our sales team.
