## Android™ Industrial+

The Android™ Industrial+ features a highly reliable operating system optimized by ACD for all ACD mobile devices. The operating system originates from ACD in Germany. ACD ensures that data security is guaranteed for the customer and no data is transmitted to third parties. Android™ Industrial+ is a reliable Android™ with many years of availability.

### Safety

- No data migration; data security through independence of Google services
- Extended Security and Update Service covering the entire product lifecycle and beyond for security patches
- Guaranteed security and support for Android™ versions, even when they are no longer supported
- Fast integration and distribution of security patches (within 80 days); highly critical security updates within 15 days

### Long-term availability

- Industrial grade hardware and software with availability of up to ten years

### ACD Android™ apps

- Other ACD apps including KioskMode, KioskBrowser, ScanConfig and EasyToConfig, etc.

### Made in Germany

- Originates with ACD in Germany

### Configuration and management

- Fast and easy configuration of Android™ devices
- Standard interfaces for use with commonly used Mobile Device Managers (MobileIron, SOTI®)
- SOTI® certification for M2Smart®SE

### Service und Support

- Service and support in Germany
- Fast response (for customer-specific adaptations or questions)
- Direct contact with ACD development team if necessary

### Upgrade service

- Upgrade to higher Android™ versions
